ABOUT ME

I am focused on building a career in management, project leadership, and consulting, with a strong interest in finance and organisational strategy. Through my leadership roles and institutional involvement, I've learned how to think structurally, take responsibility, and make decisions in high-responsibility settings. I look for challenges that push me to improve, grow professionally, and build knowledge that lasts. I want to lead in a way that is clear, accountable, and focused on bringing out the best in both results and people.
